

Pitch package — Sky Mavis Builders Program

This directory holds everything needed to submit Axie Duel to Sky Mavis: pitch deck content, email templates, social copy, and the video script.

Files

File	Purpose	Where it ends up
PITCH_DECK.md	10-slide deck content + speaker notes	Exported to PDF (Slidev / Keynote / Figma), attached to email
EMAIL_TEMPLATE.md	Cold + follow-up emails to Sky Mavis	Sent to <code>builders@skymavis.com</code> and <code>partnerships@skymavis.com</code>
DISCORD_INTRO.md	Posts for <code>#builders-program</code> , <code>#mavis-hub-greenlight</code>	Posted in Axie Discord (invite)
TWITTER_THREAD.md	10-tweet public reveal thread	Posted from project Twitter handle
VIDEO_SCRIPT.md	5-min screen-recording script + YouTube metadata	Recorded → uploaded as unlisted YouTube

Suggested order of operations

1. **Export pitch deck → PDF.** Use [Slidev](#) for a markdown-native flow (`slidev export pitch/PITCH_DECK.md`), or copy slides into Keynote / Figma.
2. **Record the 5-min video.** Follow `VIDEO_SCRIPT.md` timing. Upload to YouTube as unlisted.
3. **Send the cold email.** Use `EMAIL_TEMPLATE.md` template #1 to `builders@skymavis.com` . CC `partnerships@skymavis.com` with template #2.
4. **Post on Discord.** Once email is out, post in the relevant channels per `DISCORD_INTRO.md` . Don't spam — pick one channel, wait 24 h, then move to the next if needed.

5. **Post the Twitter thread.** Once Discord and email have landed, post the public thread per `TWITTER_THREAD.md` .
6. **Wait 7 days.** If no reply, send the follow-up template (template #3 in `EMAIL_TEMPLATE.md`).

Single source of truth for facts

If a fact appears in two places (deck + email + tweets), the deck wins. Update there first, then propagate. Common facts to keep in sync:

- LOC count: **22,800 TS / 155 Solidity**
- Tests count: **73+ green** (game-rules suite alone — the API/game-server have additional integration tests; verify before sending)
- Cards count: **31** (20 Axies + 6 Spells + 5 Traps)
- Endpoints: **42+ documented in Swagger**
- Solo build time: **3 months intense**
- Live URLs: `https://axie-duel.vercel.app` · `https://axie-api-production.up.railway.app` · `wss://axie-game-prod.up.railway.app`
