

Email templates — Sky Mavis outreach

Three templates ready to send. Copy → adjust links/handles → send.

1. Cold email — builders@skymavis.com

Subject: Builders Program submission – Axie Duel (production-grade tactical TCG using Axie NFTs as cards)

Hi Sky Mavis team,

I'm Anuar Issa, founder & lead engineer of Axie Duel – a tactical card game that turns any Axie NFT into a unique playable card via a deterministic parts → stats algorithm.

The MVP is already live in production:

- Web <https://axie-duel.vercel.app>
- API <https://axie-api-production.up.railway.app>
- Game <wss://axie-game-prod.up.railway.app>
- Repo <https://github.com/anuarissa/axie-duel> (public, MIT/private-beta)

Quick technical snapshot:

- Next.js 14 + Colyseus 0.16 authoritative game-server (anti-cheat by architecture)
- Prisma + Postgres + Redis • Express API w/ Swagger UI on /docs
- viem 2.x • 3 Solidity contracts (OpenZeppelin) Saigon-ready
- 73+ tests green • CI/CD GitHub Actions • TypeScript strict
- Web2-first onboarding (Google / MS / Facebook) + Ronin Waypoint MPC for Web3 users

Why we think this fits the Builders Program rationale:

1. Direct Axie utility – every NFT (3M+ in circulation) deterministically becomes a unique, audit-friendly playable card. Live demo at /my-axies.
2. AXS demand sink – tournament entries (AXS or SLP) split 90 % to players / 5 % permanent burn / 5 % to a transparent multisig game treasury that funds content + audits. Direct deflationary pressure plus sustainable project runway.
3. F2P balance manifesto – starter decks competitive on top ladder.

NFT

cards are side-grades, not upgrades. Counters the 2021 pay-to-win narrative head-on.

4. Web 2.5 onboarding – Google sign-in for non-crypto users; Ronin layer unlocks for those who want it. Expands TAM beyond the existing Axie audience.

I'd love to:

1. Submit to Mavis Hub: Greenlight (game is in playable beta – full game loop, PvE ladder, tournaments, daily quests).
2. Apply to the Builders Program in the next intake cycle.
3. Get guidance on the right channel for Saigon contract deployment + internal API tier upgrades.

Attached: pitch deck (PDF).

5-min YouTube walkthrough: <https://youtu.be/4z2y129pa0Y> (unlisted)

Happy to set up a 30-min call any timezone.

Cheers,

Anuar Issa

2. Cold email (BD-flavored) —

partnerships@skymavis.com

Subject: Partnership inquiry – production tactical TCG using Axie NFTs (live MVP)

Hi partnerships team,

Quick BD-flavored intro – same project as the email I'm sending to builders@, but framed for the partnerships angle.

Axie Duel is a tactical card game live in production at <https://axie-duel.vercel.app> . It uses Axie NFTs as playable cards via a deterministic algorithm and runs a tournament economy with a 90 / 5 / 5 split – 90 % to players, 5 % permanent burn, 5 % to a transparent multisig game treasury (AXS or SLP entry).

What I think is BD-relevant:

1. New TCG-genre funnel for Axie holders + new Web2 funnel for non-crypto TCG players (Hearthstone / Master Duel converts).
2. AXS + SLP burns are real, public, on-chain (post-mainnet). Direct positive-supply impact for Sky Mavis.
3. Mavis Marketplace alignment – rare Axie parts produce distinctive in-game effects, justifying premium pricing through gameplay diversity (not pay-to-win).
4. Sponsored tournaments + co-branded events possible from day 1 of a partnership.

Tech is already solid (TS strict + 73+ tests + 3 deployed services + CI), so the discussion is about ecosystem fit, IP terms (we use a working title, open to rename), and revenue split structure (we follow your published Builders Program tiers by default).

I'm submitting in parallel to builders@ for the Builders Program track. If the partnership angle is the better channel, please point me there.

Thanks,

Anuar Issa
anuarissa117@gmail.com

3. Follow-up (1 week if no reply)

Subject: Re: Builders Program submission – Axie Duel (quick follow-up)

Hi team,

Quick follow-up on my email from last week re: Axie Duel submission to the Builders Program / Greenlight.

A couple of updates since:

- [TODO before sending: list one or two concrete shipped changes – e.g. "Saigon contracts deployed at 0x...", "/my-axies live demo updated", "added tournament-burn ledger", etc.]

If the form / Greenlight cycle is the right channel right now, I'm happy to wait – just want to confirm receipt and that this is on the radar.

Also happy to do a 30-min screen-share walkthrough of the live product if that's the easier path.

Thanks again,

Anuar Issa

Sending checklist

Before hitting send on email #1:

- ☐ PDF of **PITCH_DECK.md** exported (Slidev or Keynote/Figma)
- ☐ PDF file size < 10 MB (compress images if needed)
- ☐ YouTube walkthrough uploaded (unlisted) and link inserted
- ☐ Twitter handle filled into the signature

- ☐ All three live URLs respond with HTTP 200
- ☐ Repo is public & README looks professional in browser
- ☐ `/my-axies` Demo Mode renders 5 cards in < 2 s
- ☐ `/docs` Swagger UI loads without auth
