

Twitter / X thread — Axie Duel public reveal

10-tweet thread to launch the project publicly + tag Sky Mavis. Post once email + Discord intros are out (so any incoming traffic finds context).

Targets to tag (in tweet 1):

- [@AxieInfinity](#)
- [@SkyMavisHQ](#)
- [@Jihoz_Axie](#) (Jeff Zirlin, Sky Mavis co-founder)
- [@RoninNetwork](#)

Hashtags (sprinkle, don't spam): [#AxieInfinity](#) [#AxieBuilders](#) [#Web3Gaming](#)
[#Ronin](#) [#TCG](#)

Thread

1/10 — Hook

```
 I built Axie Duel – a tactical card game where every Axie NFT becomes a unique playable card via a deterministic algorithm.  
  
3 months solo. 22k+ LOC. Live in production. No wallet needed to try the demo.  
  
Built for the Axie ecosystem, submitted to @SkyMavisHQ Builders Program.  
  
Quick tour 🖱️
```

(attach: 30s GIF/video of [/my-axies](#) Demo Mode rendering 5 Axies as cards)

2/10 — The hook explained

The killer mechanic:

Connect your Ronin wallet → server reads your Axies on-chain → queries the Axie GraphQL Gateway for the 6 parts (eyes/ears/mouth/horn/back/tail) → applies a deterministic lookup table → renders a unique card with stats + class + effect.

Same Axie always → same card. Audit-friendly.

(attach: side-by-side screenshot — Axie #5234 → Beast card output)

3/10 — The Web 2.5 thesis

The Web 2.5 thesis:

- Web2 players sign in with Google in 5 seconds. Pick a free starter deck (Plant / Bird / Beast). Play matches. Climb the ladder.
- Web3 players connect Ronin Wallet. Their Axies become cards. Play in tournaments with AXS / SLP entry → 90 % to players, 5 % permanent burn, 5 % to a transparent game treasury.

Both compete on equal ground.

4/10 — F2P balance manifesto

The F2P balance promise:

NFT cards are SIDE-GRADES, not upgrades.

Stat ranges overlap with starter cards. Effects are conditional, not straight buffs. Top 10 % of the ladder is reachable F2P, validated quarterly with public balance reviews.

NFT holders get flavor + collectibility + tournament access.

(attach: docs/F2P_BALANCE_MANIFESTO.md screenshot or link)

5/10 — Tournament economy

The deflationary tournament loop:

Entry fee → AXS or SLP

- 90 % to players (skill-rewarded, top 3: 60 / 25 / 15)
- 5 % permanent BURN (sent to 0x...dEaD)
- 5 % to a transparent game treasury (multisig – funds content, audits, F2P prize seeding)

Every tournament = real, on-chain, public deflationary pressure + a sustainable operating fund the community can audit.

Yes, including SLP. The legacy token gets a real utility sink.

(attach: ECONOMY.md flow diagram screenshot)

6/10 — Tech stack

Production-grade from day 1:

- @nextjs 14 on @Vercel
- Colyseus 0.16 authoritative game-server (anti-cheat by architecture)
- Prisma + Postgres + Redis on Railway / Supabase / Upstash
- viem 2.x for Ronin • 3 Solidity contracts ready for Saigon
- @WaypointMavis OAuth + EIP-4361 SIWE
- 73+ tests green, CI/CD, TypeScript strict, Swagger UI

Built solo. Ship velocity > team size.

(attach: GitHub repo screenshot or stat strip image)

7/10 — Live links

Try it now (no signup, no wallet):

<https://axie-duel.vercel.app/my-axies>

Hit "Run demo" → see 5 preset Axies render as unique cards in ~2 s.

Or paste any Ronin address into the Live wallet box → fetch their real Axies from the GraphQL gateway.

Repo: <https://github.com/anuarissa/axie-duel>

8/10 — IP & ethics

On IP — Sky Mavis owns the Axie brand. Axie Duel is:

- Fan-made, no copied art (original SVGs)
- Not officially affiliated (yet)
- Working title — open to rename
- Public APIs only · zero unauthorized data
- Disclaimer on every page

If Sky Mavis greenlights this, we go official. If not, it stays a respectful tribute.

9/10 — The ask

What I'm asking from @SkyMavisHQ:

1. Acceptance to the Builders Program
2. Mavis Hub: Greenlight listing
3. Higher API tier on the Axie GraphQL Gateway
4. Engineering guidance for Saigon contract deployment

What I bring:

- Production-grade product, live now
- Real, deflationary AXS / SLP utility
- Mobile-first TAM expansion
- Open repo • auditable algorithms

 10/10 — Close

This is for every Axie holder whose NFT has been sleeping in their wallet, every TCG player who never got into Web3, and every gamer who deserves a fair game where skill > stripe.

Built with @AxieInfinity in mind. Hoping to build with @SkyMavisHQ next.

Thanks for reading. RT if you'd play this 

<https://axie-duel.vercel.app>

5-min walkthrough → <https://youtu.be/4z2y129pa0Y>

Posting checklist

- ☐ Twitter handle decided & in bio (project handle or personal handle)
- ☐ Pinned tweet ready (probably the 5-min YouTube walkthrough)
- ☐ All 10 tweets drafted in the Twitter compose UI before posting (so the thread doesn't break mid-way)
- ☐ Media attached on tweets 1, 2, 4, 5, 6

- ☐ Schedule for ~9–11 AM EST (peak Web3 Twitter engagement window) on a weekday
- ☐ After posting: reply once to your own thread with the live URL (boosts the algorithm)
- ☐ Quote-RT from any backup account or by tagging a friend who'll RT
- ☐ Save analytics screenshot 24 h later for follow-up materials

Anti-cringe reminders

- Don't tag Sky Mavis founders in EVERY tweet — once at the top is enough.
- Don't use 5+ hashtags per tweet. 1–2 max.
- Don't beg for RTs except in the last tweet.
- Don't fake-edit the thread. If you typo, leave it. Authentic > polished.
- Don't reply to your own thread with marketing copy. Reply with substance (a cool detail, a screenshot, an FAQ answer).
