

Axie Duel

A tactical card game blending classic TCG depth with Axie's iconic universe and Web3 digital ownership.

Web 2.5 design: anyone plays free with starter decks · Axie holders connect Ronin to unlock NFT-as-card mode with deterministic parts→stats algorithm.

Quick stats (May 2026)

Metric	Value
LOC	~22,800 TypeScript + 155 Solidity
Tests	99+ passing across 10 test suites
API endpoints	42+ documented (Swagger UI)
DB models	15 (Postgres 16 via Prisma)
Cards in catalog	31 (20 Axies + 6 Spells + 5 Traps + extensible system)
Smart contracts	3 (ERC-20 capped + ERC-721 cards + AXS mock) — Saigon-ready
Auth providers	Google · Microsoft · Facebook · Ronin Waypoint · EIP-4361 SIWE
Deployment	Vercel (web) + Railway (API + game-server) + Supabase (DB) + Upstash (Redis)
Project age	3 months intensive solo development

Architecture

Authoritative server: Colyseus state schema, all game actions validated server-side via **ActionValidator + Zod**. Client never trusted.

Deterministic replay log: every match emits structured events to a 10k-cap log → analytics + audit + cheat detection.

🎮 Core game loop

1. **Sign in** with Google/MS/Facebook (no wallet required)
2. **Pick a starter** (Plant / Bird / Beast — full competitive deck)
3. **Battle a bot** (Rookie / Veteran / Master difficulties)
4. **Build your deck** (40-60 cards, max 3 copies)
5. **Optional Web3:** connect Ronin Wallet → unlock your Axie NFTs as unique cards via deterministic parts algorithm

6. **Compete** in tournaments (AXS/SLP entry, **90 % players · 5 % burn · 5 % game treasury**)

See [docs/RULES.md](#) for full mechanics.

Documentation

Doc	Description
docs/RULES.md	Full game rules in plain language
docs/PARTS_ALGORITHM.md	Deterministic Axie parts → card stats algorithm (the Web3 hook)
docs/ECONOMY.md	AXS/SLP burn mechanics, tournament economy, revenue split
docs/F2P_BALANCE_MANIFESTO.md	F2P competitive promise + balance design
docs/WEB_25_MANIFESTO.md	Why Web 2.5 is the future of Web3 gaming
docs/deployment.md	Self-host setup (Vercel + Railway + Supabase)
pitch/PITCH_DECK.md	Full pitch deck for Sky Mavis Builders Program

Quickstart for developers

Prerequisites: Node 20+, npm 9+, Docker (for Postgres + Redis local).

```
# Clone
git clone https://github.com/anuarissa/axie-duel.git
cd axie-duel

# Install workspaces
pnpm install

# Start Postgres + Redis (Docker)
docker compose up -d

# Apply DB migrations + seed
pnpm --filter @axie-duel/api db:migrate
pnpm --filter @axie-duel/api db:seed

# Run all services in parallel
pnpm dev
# → web      :3000
# → api      :3001
# → game     :2567
```

Tests:

```
pnpm test          # 99+ tests, ~5s
pnpm typecheck     # 10/10 packages
```

Deploy:

- Web → Vercel (auto on push to `main`)
- API + game-server → Railway (auto on push)
- DB migrations → `prisma migrate deploy` runs in API `start:prod`

Sky Mavis Builders Program

Status: Active candidate, May 2026.

IP & License

- **License:** Private-Beta (no commercial redistribution without permission)
- **Axie Infinity, Ronin, AXS, and Lunacian** are trademarks of **Sky Mavis Pte. Ltd.** This project consumes Sky Mavis's public APIs for rendering and validation; it does not redistribute or tokenize any Axie NFT.
- ERC-721 contract [AxieDuelCardNFT](#) mints **game-internal cards** (Spells/Traps), NOT representations of Axie Infinity NFTs.
- All Axie Infinity art assets remain property of Sky Mavis. This project uses generated SVG placeholder art for cards.

Roadmap

Q2 2026 — Builders Program candidacy (current)

-  MVP playable beta in production
-  Web 2.5 onboarding (Google → starter → optional Ronin)
-  NFT parts → card algorithm V1
-  Sky Mavis pitch + Greenlight submission

Q3 2026 — Partnership integration

- Deploy 3 contracts to Saigon testnet (with Sky Mavis guidance)
- Live Axie GraphQL integration (replace V1 mocks)
- Tutorial guided match (Block 3 Phase 2)
- Greenlight community feedback iteration

Q4 2026 — Mainnet + economy

- Migrate contracts to Ronin mainnet
- On-chain AXS economy (real burns + rewards)
- First sanctioned tournaments with prize pools

Q1 2027 — Content + esports

- 100+ new cards (Mech / Dawn / Dusk classes)
- Ranked seasons + leaderboards
- Mobile apps (PWA → App Store / Google Play)
